Art Unit: 2877

**DETAILED ACTION**

**Claim Rejections - 35 USC § 112**

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9, 12-15, 17, 18, 20, 21, 24, 25, 38 and 39 are rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification is silent with respect to the projection of a substantially parallel beam of electromagnetic radiation through the capillary tube as is now being claimed in lines 7 and 8 of amended claim 1. In lines 6 and 7 on pages 7 and 8 and in lines 1-3 on page 11 of the specification, the laser beam(s) is/are disclosed as being focused. Amended claim 1 contains new matter. Applicant is required to cancel the new matter in the reply to this Office Action.

Absent the new matter, the prior art applied to the claims under 35 U.S.C. § 102 and 35 U.S.C. § 103 in Paper No. 7 would anticipate and render the claimed invention obvious.

**Allowable Subject Matter**

Claims 10 and 11 are allowed over the prior art of record.

As to claim 10, the prior art of record, taken alone or in combination, fails to disclose or render obvious a device for detecting a micro-particle in a fluid, wherein the micro-particle is tagged with a fluorescent substance having a magnetic charge, in combination with the rest of the limitations of the claim.
